cycle. With the upcoming inquiry into the animas issue I think our need for high pressure av support will increase this year. Also document production and FOIAs are going to be a heavy load. We got 4 big ones in this weekend.

A lot to consider and quickly huh??

Rokha AND Tony really did great acting this week and everyone is doing great. I previewed the dashboard today on the projector for everyone and got positive feedback and a lot of very good suggestions and comments about priorities from everyone really. A good day. Tomorrow will hopefully be a good day with positive results expected on the infosec report.

Have fun and hope you are relaxing.
